# helios VERSION 12

## POWERFUL, POINT-OF-SALE SALON SOFTWARE

Maintain absolute control over all aspects of your sales and inventory while presenting an intuitive and accessible customer checkout process.

**helios VERSION 12**
**ENTERPRISE** ON OUR SERVERS

**Helios 12 Enterprise** utilizes Helios managed enterprise level servers to provide real-time data synchronization without the headache or overhead of expensive server management. It is designed to facilitate any number of business locations and can grow with your business.

Helios **increases productivity**, **improves accuracy** and **provides greater control** over your business, without expensive initial costs, or lengthy training requirements.

**helios VERSION 12**
**DESKTOP** ON YOUR PC

**Helios 12 Desktop** is ideal for the single business location or individually-operated locations. It is the upgrade to Version 11, the industry's favorite salon software that most salon owners have come to know and love. If your business expands in the future, it is a simple conversion from Version 12 Desktop to Enterprise in order to take advantage of the multi-location features and benefits.
